How can it help your pet?

PRP can be introduced in or around an injured joint, tendon, or used in its gel form to treat large burns or wounds.

- ⦿ **Complimentary to your pet's next surgery**
- ⦿ **Osteoarthritis**
- ⦿ **Tenosynovitis**
- ⦿ **Wound Care**
- ⦿ **General Inflammation**
- ⦿ **Post Surgical Healing**

How does it work?

Platelets that are found in whole blood contain many healing growth factors and bioactive proteins. These bioactive proteins can initiate tissue healing, and assist with inflammation. The treatment offers an affordable all natural alternative to drugs and steroids.

Why Choose PRP Therapy?

Ardent's Platelet Rich Plasma Kit, or PRP, is a breakthrough product for pets utilizing blood plasma with concentrated platelets that once activated accelerate the healing properties of the isolated growth factors at a fraction of the cost of traditional human treatments.
